

Why use STOCKLYX Buckets?

- ◆ Top quality raw materials are only used in their manufacture.
- ◆ Strict quality control procedures from the first to the last bucket ensure consistency throughout.
- ◆ Palatable for good intakes.
- ◆ Comprehensive range to suit most livestock systems.
- ◆ Cost effective and easy to use - 20kg mineral lick 18 kg feed lick.
- ◆ Fully balanced with minerals, trace elements and vitamins to help improve performance and health of livestock.
- ◆ Formulated using local forage mineral status.
- ◆ Top quality energy and protein sources are used in the feed bucket to give consistent results.

Feeding tips

- ◆ Ensure enough feeding sites are available for stock. We recommend one bucket per 10-15 cattle or one per 35-40 sheep
- ◆ Feed ad-lib and place away from water to control intakes
- ◆ Forage should be offered at all times
- ◆ Intakes will vary according to forage quality and quantity , liveweight and condition of stock and weather .
- ◆ Place buckets in tyre or drum to avoid tipping especially useful with cattle

Product	Intake Guide	
Sheep Hi Spec	Sheep	up to 60g/head/day
Cattle Hi Spec	Dairy/Sucklers Growing Cattle	up to 175g/head/day up to 125g/head/day
Cattle Hi Mag	Cattle	150-175g/head/day
High Energy	Cattle Sheep	200-300g/head/day 100-120g/head/day
Energy Mag	Cattle Sheep	up to 350g/head/day up to 150g/head/day

STOCKLYX are a new range of molassed buckets available from CCF Country Stores.

They have been formulated using the latest research findings on livestock requirements to provide the correct balance of minerals, trace elements and vitamins needed for good stock health and performance.

Available in two ranges **STOCKLYX MINERAL** and **STOCKLYX FEED**.

STOCKLYX MINERAL

	Calcium %	Phosphorus %	Magnesium %	Sodium %	Selenium mg/kg	Cobalt mg/kg	Iodine mg/kg	Manganese mg/kg	Zinc mg/kg	Copper mg/kg	Vitamin A iu/kg	Vitamin D3 iu/kg	Vitamin E mg/kg	Vitamin B12 mcg/kg
Sheep Hi Spec	8	4	3	5	25	100	150	1500	3000	-	200K	40K	1000	150

Cattle Hi Mag	4	0.5	15	3.5	30	400	1500	4000	4000	2000	200K	40K	250	-

Sheep Hi Spec

Ideal for all types of sheep at grass, indoors or on winter rations. Formulated to provide the correct balance of minerals, vitamins and trace elements with particular attention paid to beneficial micro-nutrients at tugging and lambing. With Sel-Plex selenium and extra high levels of vitamin E to help boost the ewes immune system, ease lambing and produce strong viable lambs. Contains vitamin B12 to help prevent CCN. Ideal to use before compounds are introduced to keep ewes in peak condition before lambing.

Cattle Hi Spec

Use for dairy, suckler and youngstock to balance grass and forages throughout the season. Feed to cattle on summer and autumn grazing to balance mineral deficiencies in grass and to ensure good health and performance is achieved. Contains multiple sources of copper for better availability including protected forms to prevent "lock up" from antagonists. Sel-Plex is included to boost immune system, and combat infection e.g. mastitis.

Cattle Hi Mag

Use for all cattle at risk from grass staggers or at grass to balance mineral deficiencies found in pasture. Containing 15% magnesium plus a full range of all other minerals and vitamins for a fully balanced diet. Key elements such as zinc, selenium and vitamin E have been boosted to help improve the animal's immune system providing greater ability to fight off disease and infection therefore helping to lift performance. Multiple sources of copper are used including in the protected form for better availability.

STOCKLYX FEED and MINERAL

	Crude Protein %	Oil %	ME (DM) MJ/kg	Calcium %	Phosphorus %	Magnesium %	Sodium %	Selenium mg/kg	Cobalt mg/kg	Iodine mg/kg	Manganese mg/kg	Zinc mg/kg	Vitamin A iu/kg	Vitamin D3 iu/kg	Vitamin E mg/kg
High Energy	16	9.5	12.5	3.5	1.2	2.5	1.5	10	75	100	400	1000	50K	10K	250
Energy Mag	8	8.5	11	4.5	0.15	10	3	10	75	100	400	1000	50K	10K	250

Hi Energy

Use for all types of sheep during tugging, early pregnancy and pre/post lambing. With multiple sources of energy, including Megalac, to provide the ewe with extra energy at critical times, especially pre/post lambing and tugging. Rich in sugars to help prevent twin lamb disease. Top quality protected protein is used to help boost milk production. Fully balanced with minerals, trace elements and vitamins to help fertility, ease lambing and produce lambs with vitality. Use from tugging to maintain ewe condition and health and to boost lambing percentage. Can also be fed to all types of cattle where extra energy is needed in the diet - especially useful during bulling and to help appetite.

Energy Mag

With extra energy and protein along with good levels of magnesium, this is ideal when extra supplementation is needed on forages and grass. Recently calved cows, youngstock on late summer/autumn grazing will benefit from a nutritional boost. While helping to prevent grass staggers, the extra energy and protein provided helps balance declining grass quality in the autumn and will maintain growth rates and performance. Fully balanced with minerals, trace elements and vitamins. Can also be used for post lambing ewes where there is a risk of grass staggers. Ideal for mixed grazing situations.
