

## Centenary Excel Calf Milk Replacer 17% Oil, 22% Protein

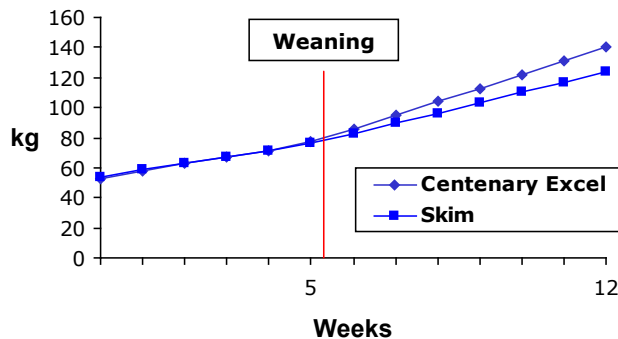

A highly digestible whey based milk replacer containing Greenline®, which is a synergistic blend of nutritional ingredients to aid performance.

Greenline® calf milk has been shown to aid digestion and respiratory functions. Trial results from Trouw Nutrition International show that there is a 14% increase in live weight gain with calves fed Greenline® milk replacer.

	Greenline® Calf Milk	Control
Start Weight	41.4	40.4
Finished Weight	75.1	69.9
LWG	33.7	29.5

### Advantage of Centenary Excel Calf Milk Replacer Post-Weaning

Better fats and oils means better digestibility and better growth. The oil and fat fraction in Centenary Excel provides a significant part of the daily energy input of the calf.

Trials have shown that calves fed Centenary Excel Calf Milk Replacer excreted half as much fat as calves fed a competitor's brand, which means greater fat retention and more digested energy.

### Additional Flexibility

CCF are uniquely able to offer the addition of medication to calf milk where required and under vet prescription. Minimum 1 tonne order applies.

## Centenary Starter Feeds

To complement Centenary Excel Milk Replacer, and to follow the concept that healthy calves grow faster, CCF also offer the following range of young animal diets:

### Centenary Nugro Pellets 18 % protein, 4.5% oil, 9% fibre

For customers wanting the uniformity of a 4mm pellet, Centenary Nugro is a palatable, high specification starter diet. Like all Centenary Products, it has been formulated to maximise early rumen development and health status.

High levels of vitamin E and selenium combined with a "nustart" package ensure a fully functioning immune system.

### Centenary Breathe Easy Calf Coarse 16.7% protein, 3.8% oil, 10.5% fibre

An exceptionally high specification calf coarse mix, offering the diversity of quality raw materials, to stimulate early dry food intake. A highly digestible diet, developed with CCF members to meet modern nutritional challenges. Using Greenline® technology like Centenary Excel, Breathe Easy ensures maximum rumen development and a high health status.

The inclusion of "Emericox" essential oils gives the product its distinctive smell, opening airways and easing respiratory challenges. Chopped Lucerne ensures quality fibre intake during early rearing period.

## Computerised Calf Feeding

The stand-alone computerised calf feeder will feed up to 120 calves right through the feed curve.

Every portion is prepared fresh and individually for each calf with milk pumped to the feeding stall to allow easy feeding.

**H&L 100  
Calf Feeder**

With the second mixer option, parallel drinking by calves is possible.

Typical features include:

- Powder storage - 50 kg standard
- Automatic cleaning programme
- Additives – Powder and Liquid
- Suction hose rinsing after each calf visit
- Up to 120 calves at 4 drinking stations

**CCF offer  
both Holm  
& Laue and  
Volac Forster
