

HORSETALK

Spring 2006

Horse Talk is a publication of CCF Ltd, Main St, Clynderwen, Pembs Volume 5, Issue 2

Preparing your horse for the showing season

If you want your horse or pony to be looking its best for its first show you need to start now. Building up the right amount of muscle tone takes time and balanced exercise making sure that they use the right muscles for the right jobs. Feeding correctly so that they have enough protein to build muscles and topline, without overheating, ensuring that you feed the right balance of oils to help achieve a healthy shiny coat. To help you achieve this we have 100 days supply of show coat for you to win (see competitions).

Showcoat combines the qualities of many conditioning nutrients to create a product to help get the best out of any show pony. Natural oils and digestible fats help to produce and maintain a glossy coat with bioplex zinc for healthy skin and hooves, palatable maize and linseed oil for coat condition and calcium and phosphorous for strong bones and teeth. In addition MSM is included in the formulation. Made by Rockies.

NAF gives laminaze the five star treatment

NAF have taken laminaze, their market leading supplement for horses and ponies prone to laminitis, and made it better.

New Five Star Laminaze has been formulated in response to latest research findings. Totally natural, this advanced, veterinary approved new formula contains scientifically verified antioxidant ingredients, high levels of MSM and magnesium, yeasts and prebiotics and mint for palatability.

Antioxidants mop up increased levels of toxins, which proliferate within the system in response to the metabolic upset caused by the intake of rich grass. MSM offers valuable nutritional support to the hoof by supplying sulphur which is needed to support the disulphide bridges which hold the laminae together. Laminaze provides 600mg of magnesium per day, the recommended amount in research for laminitis, it also contains live yeast and a unique blend of prebiotics. If your horse or pony is prone to laminitis, make sure you manage him correctly, and give the five star treatment he deserves feed him Five Star Laminaze. NB: NAF Five Star Laminaze is not a cure for laminitis, however this scientific new formula provides valuable nutritional support for horses and ponies prone to the condition. CHANGES TO THE CCF OWN BRANDS

HERBAL MIX

Our own brand Herbal mix is having a face lift. It will still be the same great value mix as before just in a new bag. Don't worry you won't miss them. The new bags will be available from the 1st of April so look out for them.

COMING SOON

Look out for the latest addition to the CCF own brand family. We will soon be launching our own brand Horse and Pony Nuts. This economy cube will be at a very competitive price but of the highest quality, suitable to feed to all horses and ponies in light work, at rest or a maintenance ration. Its nutritional value will be very similar to both Baileys Economy Cubes and Spillers Horse and Pony Nuts with just slightly different levels of fibre and protein. Please ask in your local branch for a more detailed nutritional analysis and proposed launch date.

CONGRATULATIONS

To Mrs L Tinsley from Saundersfoot who wins a bag of Blue Chip Lami Lite and Miss J Hicks from Mydroilyn who wins a Dodson and Horrell saddle cloth. Look out for this newsletters great competitions.

**21st CENTURY BEDDING STANDARD
UNVEILED WITH LAUNCH OF
EASIBED PLUS**

The new bedding product **easibed plus** has at last revealed the impressive new standards being set by this completely revolutionary '21st century bedding'. The winner of a much-coveted industry innovation award, **easibed plus** contains a specific, totally natural additive proven by exhaustive testing to eliminate all moulds, which means the bedding contains ZERO moulds at the time of baling and hence offers the opportunity for previously unrivalled standards of stable hygiene.

This exciting development in equine bedding comes at a time when the real extent of the damaging equine health and performance problems caused by mould contamination of the stable environment is only just being more accurately quantified.

Easibed plus opens up the potential for significant performance enhancement benefiting all competition horses at every level and has obvious relevance for veterinary hospitals, referral centres, racing yards, studs and bloodstock breeders.

Easibed plus also contains specific 'actives' that work to reduce other contaminants in the stable environment, facilitating for example, improved hoof health and hygiene. It also contains a proven odour suppressant to improve the quality of the stable environment for both horses and people and an effective fly repellent that could potentially prove a cost effective option in yards where flies are a problem. **Easibed plus** really is a revolutionary product and like **easibed**, virtually dust free in use and totally unique in the marketplace. www.easibed4animals.co

COMPETITIONS

We have 3 x 2.5 litres of NAF Hooflyte to give away. Simply answer the following question. How long should 2.5 ltr of hoo-flyte last if fed at 60 ml per day? Please send your answers to the address below.
